AWAIS ALI RAZA

AI Engineer | **Full Stack Developer**

Lahore, Pakistan | +92 304 4810928 | awaisalirazaa@gmail.com

LinkedIn | GitHub | HuggingFace | Portfolio

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience developing and deploying 70+ Machine Learning, Deep Learning, and NLP models, including a fine-tuned Mistral LLM, Transformer-based systems, and a RAG and MCP-powered AI Career Coach. Full stack capable: builds Django and FastAPI backends, REST APIs, and microservices, plus Flutter apps, to ship models as scalable, user-facing products. A strong problem solver who turns real-world problems (career guidance, medical imaging, mental-health support, disease prediction) into working end-to-end solutions, from data preparation and model training to API integration and deployment.

EDUCATION

BSc Information Engineering and Technology **2023 – 2027**
Superior University, Lahore

WORK EXPERIENCE

Website Manager & SEO Specialist **2023 – 2024**
Sky Furdy Tech

- Managed and updated company websites for strong performance and user experience.
- Tracked website performance data to guide optimization decisions.
- Improved website rankings and organic traffic through data-driven optimizations.

Web Developer (Backend) **2024 – 2025**
Tecla Enterprises

- Built and maintained Django backend systems and database models for web applications.
- Developed RESTful APIs and managed database operations for reliable data exchange.
- Collaborated with frontend teams to ensure smooth integration and delivery.

Full Stack Developer & AI Engineer **2026**
Offneo

- Developed an AI Career Coach inside the app using RAG and MCP for career guidance.
- Designed ConnectJob and Mega Market as independent, scalable FastAPI microservices.
- Built REST APIs with request validation and auto-generated documentation.

PROJECT EXPERIENCE

AI/ML Projects

MindSync

- Built an AI-based mental health and digital wellbeing system with emotion and stress detection models using CNN, LSTM, and ML classifiers.
- Integrated RoBERTa/BERT for sentiment analysis and NLP-based chatbot support.
- Developed the backend in Django and a Flutter mobile app that delivers these AI models to users.

Mistral LLM Fine-Tuning

- Fine-tuned a Mistral-based LLM on domain-specific conversational data for emotional support, stress guidance, and personalized wellbeing recommendations.
- Integrated the fine-tuned LLM into MindSync for AI-powered mental health assistance.

AI Career Coach

- Built an AI career coach that lives inside the app, giving users career guidance through a conversational assistant.
- Implemented RAG to ground responses in relevant knowledge and MCP to connect the assistant with the app's tools and data.

Chest X-Ray Classification

- Developed and compared deep learning models (Custom CNN, AlexNet, VGG16, ResNet50) for chest X-ray analysis.
- Classified images into Normal, COVID-19, Viral Pneumonia, and Bacterial Pneumonia categories.

Image Restoration & Super-Resolution

- Built an AI model using Hybrid Attention Transformer–based techniques to restore low-quality images and enhance resolution up to 40$\times$.

Additional AI/ML Work

- Developed and deployed 70+ Machine Learning, Deep Learning, and NLP models across image classification, regression, classification, stress monitoring, and heart disease prediction.
- Worked with Transformer-based models and structured and unstructured data, covering model development, training, optimization, and deployment.

Web Projects

Great Kart

- Designed and built a full-stack e-commerce platform with React, HTML, CSS, and JavaScript on the frontend and Django with a REST API on the backend.

Live Chatting App

- Developed a full-stack real-time chat application enabling multiple users to communicate instantly, using WebSockets for live message updates and a responsive UI.

ConnectJob

- Architected a job-connection platform using microservice architecture in FastAPI, splitting functionality into independent services that can be developed, deployed, and scaled separately.
- Designed RESTful APIs with request validation and auto-generated API documentation for communication between services and client apps.

Mega Market

- Built the backend of an online marketplace using microservice architecture in FastAPI, separating core business domains into independent, maintainable services.
- Developed scalable REST APIs to support product, user, and order workflows across services.

SKILLS

AI & ML: Machine Learning, Deep Learning, NLP, LLM Fine-Tuning, Transformers, RAG, MCP

ML Frameworks: PyTorch, TensorFlow, Scikit-learn, OpenCV

Languages: Python, JavaScript, C++

Backend: Django, FastAPI, REST APIs, Microservices

Frontend & Mobile: React, Flutter

Database & Tools: MySQL, Git
